

## **Joanie Fisher Creating an Awareness**

The Mentors program has created an awareness around communication that did not exist before. The awareness itself has opened a door that leads to a place where miracles are not only possible, but to be expected! People who did not have a voice before are finally being heard! And individuals whose voices were previously ignored because of their difference are now being listened to with respect. And we will all move forward to learn from each other & grow together.
